

**Year 1**  
**Art - Knowledge Organiser**

**What I should already know**

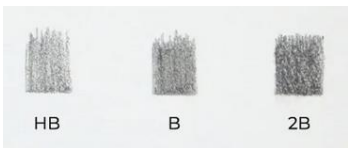

- How to hold a pencil
- How to use a paint brush
- How to make marks on a piece of paper

**Sketching pencils**

Pencils have different grades depending on how hard or soft it is.

We usually use a **HB** when we write in pencil but when we draw, the basic sketching pencil we use is grade **B**.

**Pastels**

**Soft pastels** are like chalk. They have an intense colour but can crumble easily.

**Oil pastels** are similar to wax crayons. They are bright in colour but will not smudge easily.

**Marbling**

**Ink** is dropped onto water and swirled to make a pattern. When you place paper on top of the water, the **marbling** pattern is transferred to the paper.

**Printing**

**Texture** and pattern can be created using different tools on **clay** or by **rubbing** objects with a crayon through paper.

**Chalk and Charcoal**

**Chalk** is white and made from rock. It can crumble easily and can be smudged.

**Charcoal** is black and made from wood which can crumble easily. It gives a very intense line which can be smudged easily.

**By the end of the year**

- I know how to use pencils to create lines of different thickness.
- I know the difference between HB and B pencils.
- I have experimented with different drawing materials.
- I know the primary colours.
- I can create a marbled pattern.
- I can recognise work from Vincent Van Gogh, Andy Warhol and Eric Carle.
